Project Report Format

1. **INTRODUCTION**
   1. **Project Overview**

   In the present era, the internet and new technologies are changing the information behavior of news reader. Instead of reading a copy of the local newspaper or watching the scheduled-evening news, people increasingly turn to the internet for daily news updates. News-waves is a web based application. This application deals with the user who wants to read news from the web application. The users can easily read news from all over the world. The users get to read trending and breaking news by registering themselves in the website. They also have special access to those news all over the world. This application is fully responsive and has a good-looking user interface. The users will find this application much interesting for reading the news articles.

   2. **Purpose**

   The goal of this project is to build a web based news application for everyone so that they can read all the news anywhere and anytime. This project intends to provide a better solution for the manual newspaper as it cannot be used always. The users can use this application easily anywhere and anytime.

2. **LITERATURE SURVEY**
   1. **Existing problem**

   Most of the people get the information about the world news through the internet, which is fast accessible and reliable. People have no time to be updated through newspaper or watching news in the television, so different web applications have introduced to provide news across the world. Most of the existing systems provides news only on some of the categories. Few single websites only provide local or national news. Most of the system does not integrate local, national and international news embedded in one system.

   2. **References**

   News Break - https://www.newsbreakapp.com/
   Indian Express - https://indianexpress.com/

   3. **Problem Statement Definition**

   Most of the people do not like to carry a newspaper with them. Some people want them to be updated only in the area they are interested in. Users are not possible to get latest news in their busy schedule and a lot of fake news is broadcast. A news sharing app seeks to make it easier for the users to relevant news and to clearly indicate that the information is real and has been gathered from the reputable source.

3. **IDEATION & PROPOSED SOLUTION**

    1. **Empathy Map Canvas**
    2. **Ideation & Brainstorming**

ANITHA

identity the bloggers and users

competitor analysis

use only the trusted sources

market trend tracking

receive only the information u need

curated and focused

MUGITHA

it saves users time

increase the productivity

alternative communication channel

browsing with keyword on web

competitive

create more and better content

3. Proposed Solution

We are well aware of the user's interested and uninterested topics. By providing the news feed feature which contain quick short news where user time can be saved. An application needs to be developed in which users can read news whenever they want and they will be able to customize their area of interest. which aggregates the news from all the reliable sources and categorize them under different sections for the best user experience. As it was an application-based project, correct ideation and execution can develop an application with no bugs and errors, so that the user might like our application and some might suggest and share it to their surroundings, resulting in an increase in our application insights. This solution is scalable since it is enabled through cloud technologies offered by IBM enabling scalability on a consumer demand.

4. Problem Solution fit

1. CUSTOMER SEGMENT(S)
   1. Employees
   2. Students
   3. Old people
   4. Young people
   5. Business Official

2. JOBS-TO-BE-DONE/PROBLEMS
   1. Bad user interface.
   2. Internet and dataconsumption.

3. To avoid fake news

4. Implementation of dark mode.

3. <u>TRIGGERS</u>

1. Updating of preferred news story.

2. When any news goes viral

4. <u>EMOTIONS: BEFORE / AFTER</u>

1. Feels dejected while facing glitch issues.

2. Feels frustrated while seeing advertisements.

5. <u>AVAILABLE SOLUTIONS</u>

1. User can customize their news content based upon their preferences.

2. Chatbot solves the queries

3. Recommendation of preferred news topics.

6. <u>CUSTOMER</u>

1. Cannot use in offline mode

2. Network connection

3. Payment for subscription may be high.

7. <u>BEHAVIOUR</u>

1. Installation of application using internet

2. Searching for news and wasting time on it.

3. Users get irritated while using bad user interface.

8. <u>CHANNELS OF BEHAVIOUR</u>

8.1 ONLINE

User can use this app based upon their needs. They can use read aloud option

while online.

8.2 OFFLINE

User can download their preferred news and read it Offline.

9. <u>PROBLEM ROOT CAUSE</u>

1. Appearance of unwanted notifications.

2. No download option may make the user frustrated when there is no internet

available.

3. Light from the screen may affect the user's eyes.

10. <u>YOUR SOLUTION</u>

A news app is developed to excel all expectations of the users, which stand out

among all competitors. Recommendation of preferred news topics plays a major role in this news app.

4. **REQUIREMENT ANALYSIS**

   1. **Functional requirement**

FR No.	Functional Requirement (Epic)	Sub Requirement (Story/ Sub-Task)
FR-1	User Installation	User can install the app from google play store, App store and from website.
FR-2	User Registration	Registration through FormRegistration through Gmail Registration through Mobile number.
FR-3	User Confirmation	Confirmation via Email Confirmation via OTP
FR-4	User login	User should login the app with the User's name and password.
FR-5	User Information	User can include their preferred topics so that they could be recommended by the application.

   2. **Non-Functional requirements**

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	This app is user friendly app, where users can clear their queries with the chatbot.
NFR-2	**Security**	This app is secured app,where users information is encrypted properly.
NFR-3	**Reliability**	This app can be accessed anywhere and anytime.User can download the news offline.
NFR-4	**Performance**	The app is well tested and hence the performance ofthe app is great.
NFR-5	**Availability**	Chatbot is available in this app to rectify the queriesof the users. Variety of news is provided by this app.

5. **PROJECT DESIGN**

    1. **Data Flow Diagrams**
    2. **Solution & Technical Architecture**

● The user can login to the system using their credentials.

● After checking the credentials, if the credential matches,the user can be able to search the news and feeds.

● The user has a privilege to share the news and supporting the news feeds by commenting it.

● User receives notification of updated news.

● All the information collected by user and stored in database for future purpose.

● Here we used an API for the database that called IBM DB2.
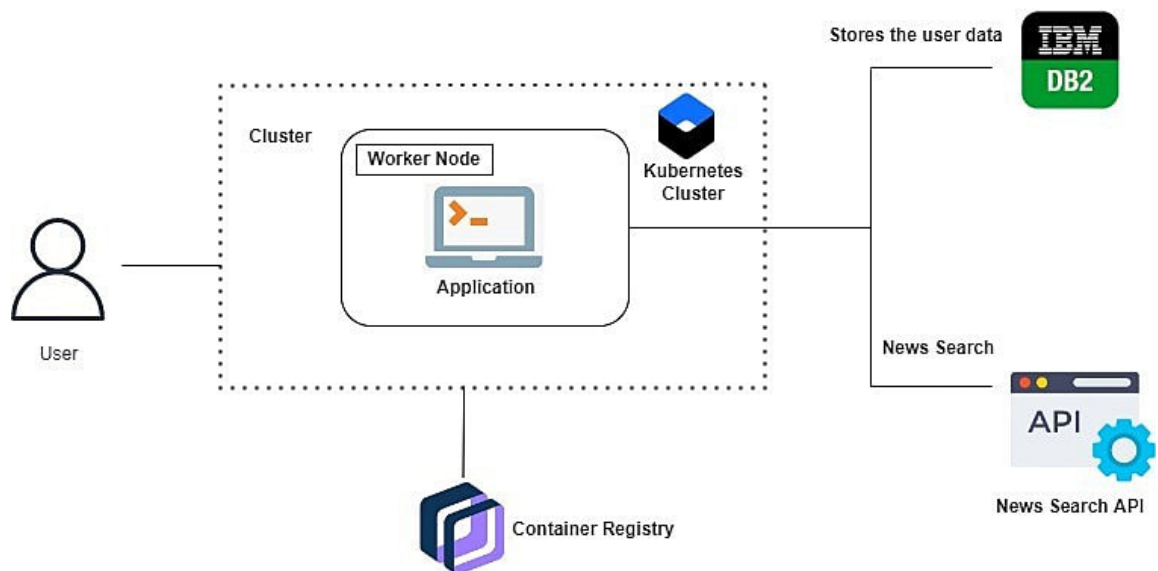

3. User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail	I can receive password to mail.	Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password	I can receive confirmation mail.	High	Sprint-1
	Dashboard	USN-6	The news portal and shows the recent news as Breaking NEWS	I can Open and view the news portal.	Low	Sprint-2
Customer (Web user)	Search Bar	USN-7	User searches for news based on their own interest.	I can view the related news and can watch videos.	High	Sprint-1
		USN-8	The news can be viewed that is appearing on the dashboard.	On the dashboard. I shall click on the news wanted and can open it.	High	Sprint-1
Administrator	Server	USN-9	Provides correct news available from the database.	Provide the correct news from the database and fake news will be rejected	Medium	Sprint-1
		USN-10	Provide live news with video and audio contents.	I can get the news in which I am interested.	high	Sprint-1

6. PROJECT PLANNING & SCHEDULING

1. Sprint Planning & Estimation

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Login	USN-1	As a user, I can log into the application by entering email & password	2	High	SETHU K.M.S, PRASANTHK
Sprint-1	Registration	USN-2	As a user, I can register for the application by entering my email, password, andconfirming my password.	2	High	MUGTHA V, ANITHA S
Sprint-2		USN-3	As a user, I will receive confirmation email once I have registered for theapplication	1	High	SETHU K.M.S, MUGTHA V
Spraint-2	Home Page	USN-4	As a user, I can view the headlines of the news that interests me	2	High	PRASANTH K, ANITHA S
Sprint-3		USN-5	As a user I can view the elaborate content of the headlines	2	Medium	SETHU K.M.S, PRASANTH K
Sprint-4		USN-6	As a user I can search a news I want	2	High	MUGITHA V, ANITHA S
Sprint-3	Chatbot	USN-7	As a user I can solve my doubts about the application with the help of the chatbot. If the doubt is not resolved the chatbot guidesus on how to contact the customer care executive	2	Medium	SETHU K.M.S, MUGTHA V
Sprint-4	About us	USN-8	As a user I can view about the application	1	Low	PRASANTH K

2. Sprint Delivery Schedule

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	4	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022	3	05 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	4	12 Nov 2022
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022	3	19 Nov 2022

3. Reports from JIRA
7. CODING & SOLUTIONING

1. Chatbot

A chatbot is software that simulates human-like conversations with users via text messages on chat. Its key task is to help users by providing answers to their questions. Bots can chat with multiple users simultaneously and provide information within seconds. Two chatbots are integrated in this website. One chatbot is used in the main page of the website before login. Another chatbot is used after the user's login and it has the features of viewing trending, breaking and updated feeds. The categories of the news can also be asked to the chatbot.

2. Integration of Rapid API

API stands for application programming interface, which is a set of definitions and protocols for building and integrating application software. Rapid API is one of the most common and widely used API. The Rapid API has a substantial amount of initial amount of API for each purpose.

We use the API named News-catcher for this project. The News-catcher API is a powerful application programming interface that allows users to find news articles by topic, language, country, website, and keywords. Hence, the use of news-catcher API in the project gives the user a better searching of news.

8. TESTING

8.1. Test Cases

The Test cases for the News Tracker application are as follows

- Verify If user can Sign up to the account
- Verify If already signed up user cannot log into the account
- Verify if user is able to see Login/Register when clicked on it
- Verify if user is able to filter articles based on categories
- Verify if user is able to see detailed information when clicked on read more

8.2. User Acceptance Testing

8.2.1 Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the News Tracker Application project at the time of the release to User Acceptance Testing (UAT).

8.2.2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved.

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	10	4	2	3	20
Duplicate	1	0	3	0	4
External	2	3	0	1	6
Fixed	11	2	4	20	37
Not Reproduced	0	0	1	0	1
Skipped	0	0	1	1	2
Won't Fix	0	5	2	1	8
Totals	24	14	13	26	77

8.2.3. Test Case Analysis

This report shows the number of test cases that have passed, failed and untested.

Section	Total Cases	Not Tested	Fail	Pass
Print Engine	7	0	0	7
Client Application	51	0	0	51
Security	2	0	0	2
Outsource Shipping	3	0	0	3
Exception Reporting	9	0	0	9
Final ReportOutput	4	0	0	4
Version Control	2	0	0	2

9. **ADVANTAGES & DISADVANTAGES**

10.1. Advantages

1. Simple to Access and Read

2. Upgrades Vocabulary and Grammar

3. Accessed anywhere and anytime

4. Prevents the usage of newspaper

5. Cost-efficient

10.2. Disadvantages

1. Not suitable for long time usage

2. Technical issues

10. **CONCLUSION**

In our website, an attempt has been made to develop a news based information site. We develop this project that helps the people and make them aware so that they can know any news. To establish this website, we use various methodologies. To develop this project, we have faced many problem but we hardly tried to develop this project. Our supervisor helps us by giving his valuable

opinion, decision and time.

11. FUTURE SCOPE

In a nut shell, the future scope of the project can be summarized as follows:

1. We can add more advanced software that includes more facilities.

2. Implement backup mechanism so that the user's data can be restored.

3. Create multiple load balancers to split up the load.

12. APPENDIX
